Palmetto

River Fern

Ruellia

Shrimp Plant

Texas Sedge

## Shade

Cast Iron Plant

Columbine

Liriope

Turk's Cap

This is only a sample of the plants that you can use in your garden. See the actual garden beds for more ideas.

Also, please keep in mind that not all plants flower at all times, so the plants that you see may not look exactly like those pictured here.

Using these native and adapted plants is good for the environment because they require less water, less pesticides, may attract wildlife.

Photos courtesy of Joseph Marcus and Andy and Sally Wasowski at the Ladybird Johnson Wildflower Center, the United States Fisheries and Wildlife Services Digital Library System, and Keeley Steenson.
